REDEFINE LIFE LAUNCHES ONLINE CONCIERGE PRIMARY CARE PRACTICE

Board-certified physicians and sisters Dr. Samantha Jean and Dr. Gerdie Jean-Smith have launched [ReDefine Life](#) in Punta Gorda, an online primary care concierge practice available around the clock for a monthly fee to patients with or without health insurance. ReDefine Life is not a doctor brokerage but a primary care private practice where patients see the same doctor every time. All primary care services are offered, including management of chronic conditions like COPD, hypertension and diabetes. Medical, natural, holistic, or combined monthly plans are available for individuals and families, including children starting at age 8. Jean is board certified in family medicine by the American Board of Family Medicine. Jean-Smith is a fellowship-trained geriatrician who specializes in aging, dementia and palliative care. She is board certified in both family medicine and geriatrics.
